

2B-Inventory

The Ultimate in Mobile Inventory, Store & Warehouse Management for Counterpoint SQL
Powerful. Simple. Portable. Guaranteed.

Manage Inventory from Anywhere – on or offline

2B-Inventory is designed for retailers and warehouses of all sizes who want the flexibility of using a rugged hand-held mobile device with barcode scanner to manage inventory and store operations. Manage store and inventory information from one easy to use mobile application.

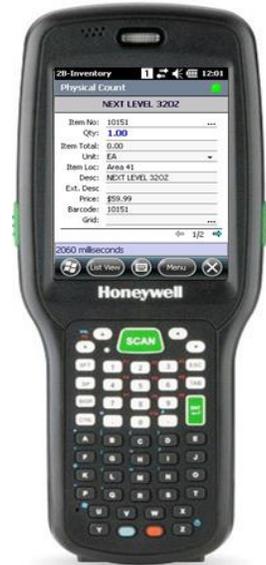

When connected to a wireless network, 2B-Inventory can send scanned data to CounterPoint anytime. A wireless connection is not required as 2B-Inventory works automatically in batch mode if there is no network or if the connection is lost.

SAVE TIME, *improve* ACCURACY

- 2B-Inventory provides anytime, anywhere access to inventory and customer details so you can be productive no matter where you are.
- *Auto Save* – All items and quantities entered are automatically saved as soon as they are scanned. No need to hit a Return or Save button!
- Lookup item pricing and quantities on hand for your customers without going back to the register.
- Scan inventory at all store locations and warehouses.
- Full Keyboard navigation with device direction pads.

MANAGE TO *win*

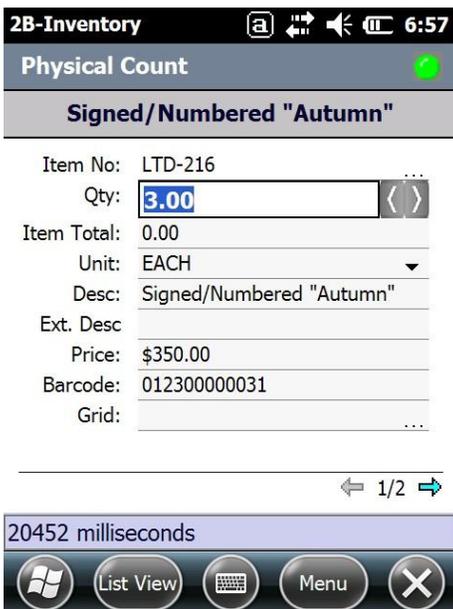

- Easy to use interface allows one click export to CP within each module.
- Scanned data is exported directly to CounterPoint ready to post.
- With 2B-Inventory you can improve the speed and accuracy of many everyday tasks as well as provide greater customer service.
